

CONFERENCE PAPERS, published JULY 1, 2020

ENERGY
EVALUATION
EUROPE

To view the paper, click on the presentation title

[Attributing savings of utility midstream energy efficiency programs: Standardizing a protocol to estimate free ridership](#)

by Laura Agapay-Read and Jan Harris

[Promoting the renewable energy generation in rural areas – The role of the Rural Community Energy Fund](#)

by David Birchby, Lisa Groves, Alec Davies, Serena Churchill, Paul Courtney, and John Powell

[Analysing Conflicting Energy and Climate Targets between Municipalities, Energy Utilities and Housing Companies in Sweden](#)

by Stefan Blomqvist, Arvid Andersson, Oscar Spinosa, Johannes Tonelid, Patrik Rohdin, and Louise Ödlund

[Urban density and energy efficiency in the London Building Stock Model](#)

by Stephen Evans, Daniel Godoy-Shimizu, Dominic Humphrey, Philip Steadman, Paul Ruyssevelt, Rob Liddiard

[Developing the framework for multi-criteria assessment of smart local energy systems](#)

by Christina Francis, Alessa Sierra Costa, R. Camilla Thomson, and David M. Ingram

[Adapting Impact Evaluation Frameworks for Energy Codes and Standards in Emerging Countries](#)

by Amandine Gal, Marie-Claude Hamelin, and Stéphanie Nour

[Evaluation of user engagement in smart local energy system projects in the UK](#)

by Rajat Gupta and Sahar Zahiri

[Can energy projects be over evaluated?](#)

by Sam Hampton and Tina Fawcett

[How to learn fast? A case study of challenges in evaluating a programme designed to bring about systems transformation](#)

by Michelle Hollier, and Emma Harrison

[Mind the gap: Tracking recommendations to improve program effectiveness](#)

by Katherine Johnson, Scott Reeves, and Nicola Tran

[Financing and delivering UK public sector energy efficiency: Insights from the Public Sector Energy Efficiency Loans Scheme evaluation](#)

by David Kenington, Michelle Hollier, Laura Edwards, and Laura Bell

[Municipalities in focus: Evaluating the Local Authorities Guideline \(LAG\) within the National Climate Initiative \(NCI\) of Germany: challenges and findings](#)

by Tanja Kenkmann, Katja Schumacher, Lothar Eisenmann, and Lisa Muckenfuss

[Life-cycle assessment of U.S. biomass supply and the role of biomass electricity for meeting UK emission objectives](#)

by Paul J Meier, Fernanda Availa Swinburn, and Andreas Vincent van Giezen

[Evaluating instruments stimulating sustainability transitions: promoting biomass boilers in Germany and the UK](#)

by Alexander Morgan, William Zappa, Robert Harmsen and Paul Lehmann

[Success and Limitations of EU & US Evaluated Energy Efficiency](#)

by Robert Neumann, Randy Gunn and Karen Maoz

[Evaluating the Net Effect of the ISDE Subsidy Scheme in the Netherlands – Comparison of Evaluation Methods to Estimate Additionality](#)

by Robin Niessink

[Aggregators as digital intermediaries to local electricity markets](#)

by Andrey Postnikov, Calum Edmunds, Jesus Nieto-Martin, Timoleon Kipouros, Yukun Hu, Ian Elders, Stuart Galloway, and Liz Varga

[The Federal Programme for Heating Systems Optimisation in Germany – evaluation methods and intermediate results](#)

by Christina Reineck, Felix Suerkemper, Florin Vondung, Stefan Thomas, and Christine Wörten

[Understanding EV Owners' Preferences Towards Enrolling in Smart Charging Programs](#)

by William Rodriguez Jimenez, and Ian Schneider

[Integrating evaluation to expand an innovative water and energy savings program in the United States](#)

by Mary Sutter, Jenn Mitchell-Jackson, Chris Cone, and Chris Bradt

[EV Charging You Can't Refuse: Unlimited](#)

by Jonathan Taffel, Julie Black, Dan Feng, and Chelsea Liddell

[Reducing transport's impact on climate change and energy consumption - the role of the EU's vehicle CO2 emissions regulations](#)

by Achilleas Tsamis, Sujith Kollamthodi, Gena Gibson, and Ella Andrew
