

Logic Modelling for Sectoral Programmes

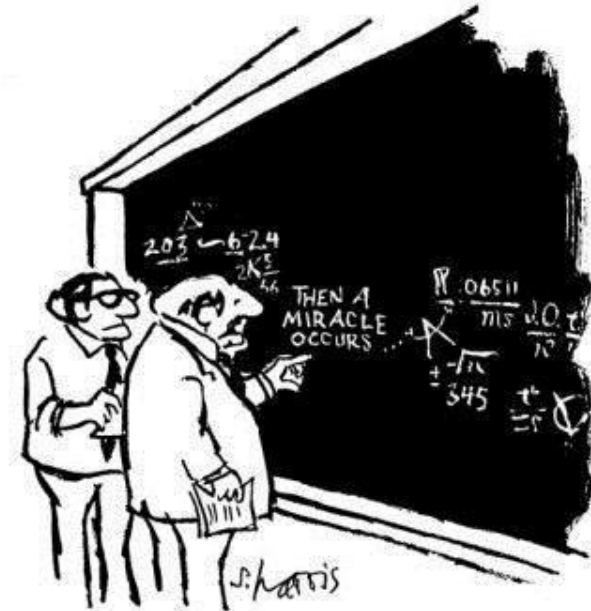

Logic Models

Objective

This mapping process aimed to achieve several objectives:

- Foster a clearer understanding of how individual programmes align with sector-wide goals.
- Identify opportunities for collaboration and resource-sharing among stakeholders.
- Uncover duplication of efforts and areas requiring additional focus.
- Identify gaps in programme and sectoral delivery.
- Provide a decision-making tool for policymakers, funders, and practitioners.

Modelling

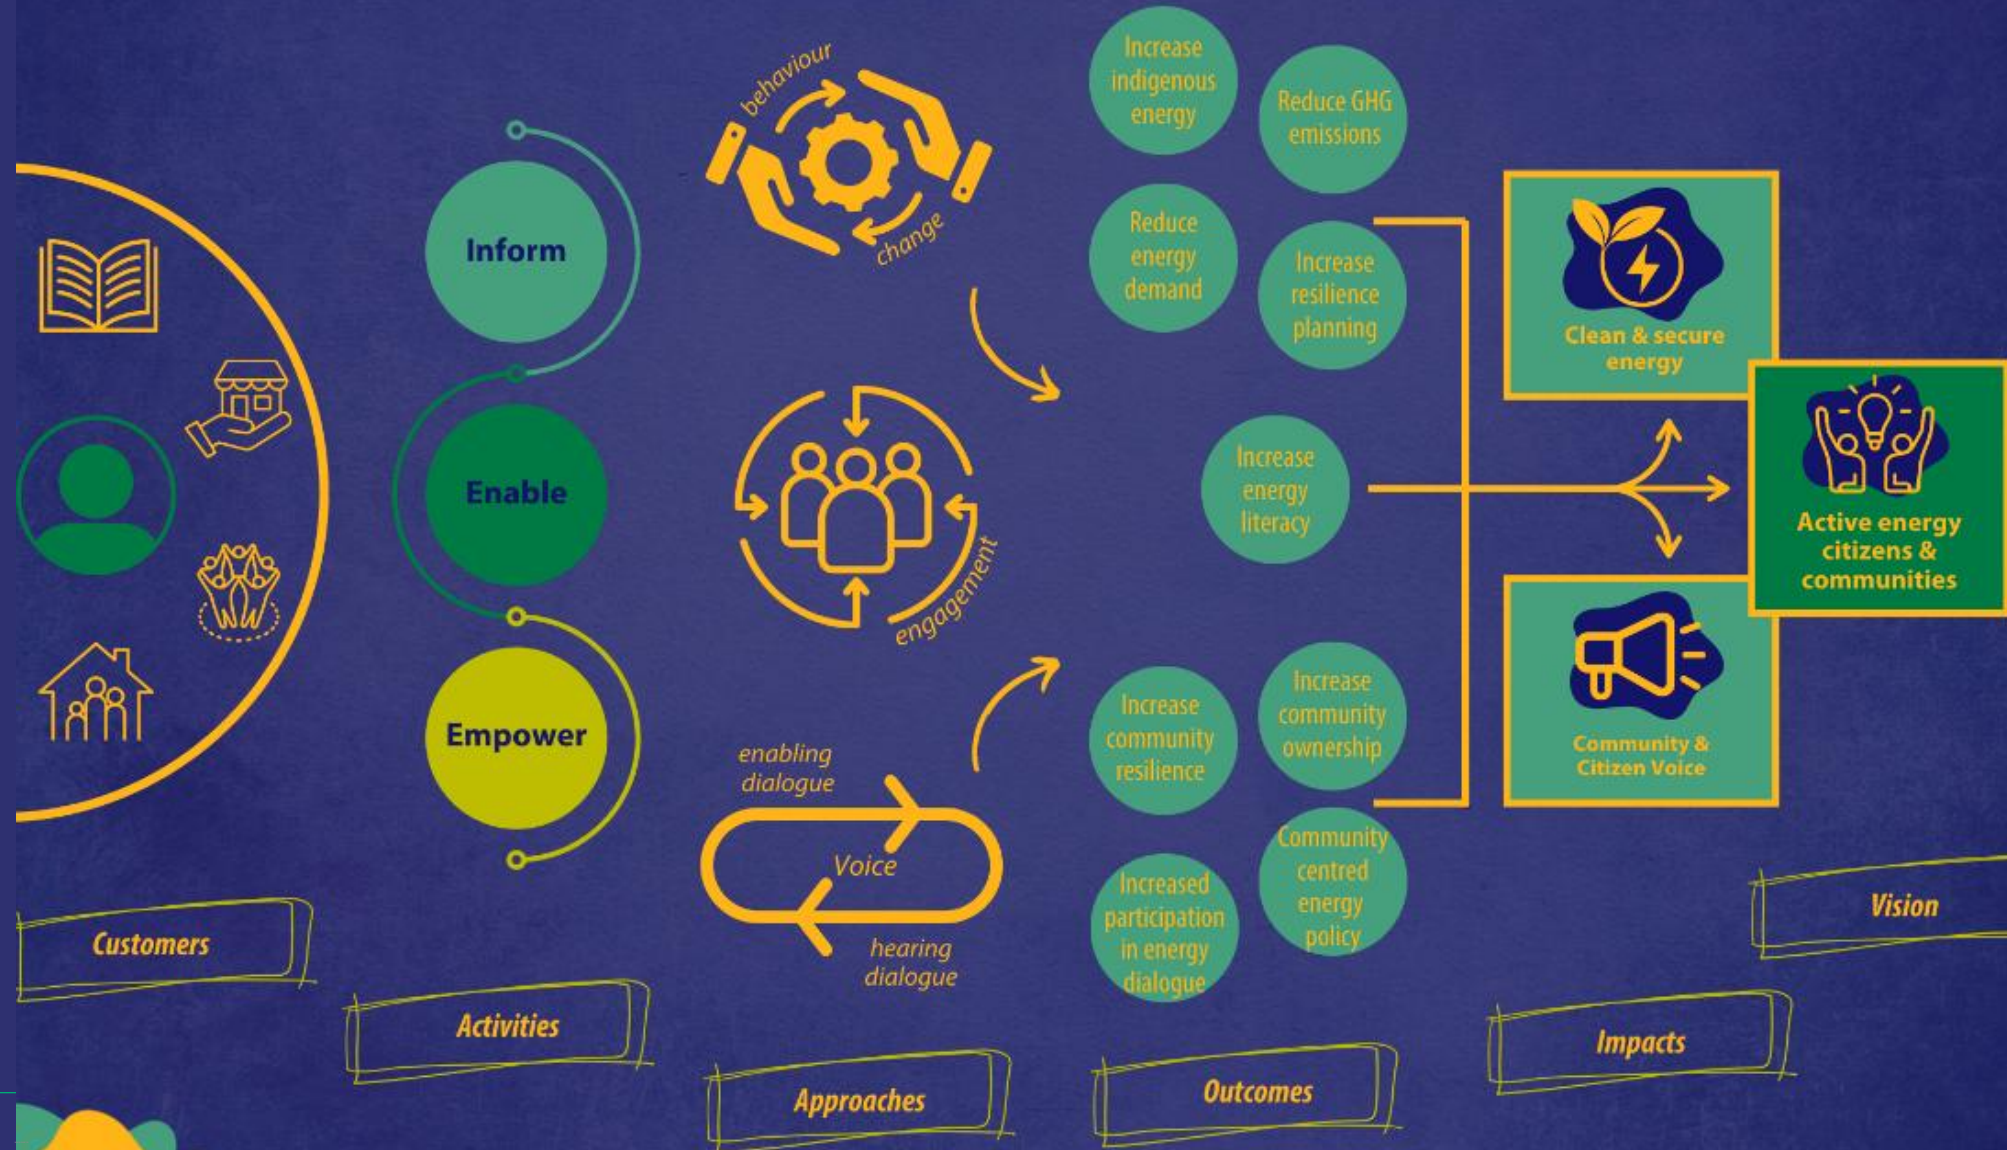

Results

- Alignment opportunities
- Isolated activities
- Gaps in delivery
- Assumptions and risk

An energy transition that is powered by active energy citizens

Next Steps

- Test the logic model through out the evaluation cycle
- Replicate in other sectors/programme groups
- Learnings for the strategy review

Any questions?

Strategic Review

Backing Irish communities to be part of the sustainable energy revolution

Evidence backed accessible locally delivered knowledge

Tailored strategic all reaching comms

Support policy makers with evidence to inform policy

Advocate for policy to protect vulnerable groups

Build strategic relationships to reach all communities

Provide accessible & tailored support

Educated & engaged citizens

Just Transition

Inclusive programmes

Influence policy
